The Private Metals Cheat Sheet

Exactly which coins, bars & weights stay 100% private when you SELL — and which ones trigger IRS reporting

📌 **SAVE THIS. REFERENCE IT EVERY TIME BEFORE YOU BUY OR SELL.** 📌

> *Not all precious metals are created equal when it comes to privacy. The type of metal you buy today directly determines how privately you can sell it tomorrow. Here is your complete at-a-glance reference — keep it handy.*

✓ GOOD NEWS FIRST: ALL PURCHASES OF PRECIOUS METALS ARE NON-REPORTABLE — REGARDLESS OF TYPE OR AMOUNT

Whether you buy Eagles, Krugerrands, bars, rounds, or any other form of metals — your purchase is never reported to the IRS, no matter how much you buy. The table below covers what happens when you SELL.

GOLD BULLION — SELLING RULES

🔒 NON-REPORTABLE WHEN YOU SELL
ANY QUANTITY · NO IRS FORM REQUIRED*

American Gold Eagle — SELL UNLIMITED — NON-REPORTABLE	*1 oz, ½ oz, ¼ oz, 1/10 oz*
American Gold Buffalo — SELL UNLIMITED — NON-REPORTABLE	*1 oz only*
Gold Austrian Philharmonic — SELL UNLIMITED — NON-REPORTABLE	*1 oz, ½ oz, ¼ oz, 1/10 oz*

⚠ REPORTABLE WHEN YOU SELL
IRS FORM 1099-B REQUIRED ABOVE THRESHOLD

Canadian Gold Maple Leaf — REPORTABLE WHEN SELLING 25+ COINS	*1 oz only*
South African Krugerrand — REPORTABLE WHEN SELLING 25+ COINS	*1 oz only*
Mexican Onza — REPORTABLE WHEN SELLING 25+ COINS	*1 oz only*
Gold Bars — Any Brand — REPORTABLE WHEN SELLING 1 KILO+	*All weights*

* **"Non-Reportable" refers specifically to IRS Form 1099-B dealer reporting requirements on the sale of your metals.** It does not mean tax-free. If you sell at a profit, you may owe capital gains tax on that gain — and it is your responsibility to report it on your tax return. Important: you only have a taxable event when you actually sell. Holding your metals for years while prices rise and fall creates no tax obligation and nothing to report — until the day you sell. Always consult a qualified tax advisor.

** See note above regarding tax obligations. Non-Reportable = no dealer IRS reporting form required. Capital gains tax may still apply when you sell at a profit.*

⚠ **THE $10,000 CASH RULE — KNOW THIS BEFORE YOU BUY**

Your **purchase** of precious metals is never reported to the IRS — regardless of type or amount. However, if you pay with **actual cash over $10,000** (including money orders and cashier's checks), your dealer is required to file IRS Form 8300 reporting the *cash transaction itself* — not the metals purchase. It is generally best to **pay by personal check or bank wire** — dealers are not required to report those transactions, keeping your purchase completely off the radar.

3 PRACTICAL TIPS FROM A LONG-TIME METALS INVESTOR

1

PAYMENT METHOD

For maximum privacy, it is generally best to pay by check or bank wire rather than cash — it keeps your transaction completely off the radar.

2

COIN SELECTION

It is generally best to stick to government-minted coins — Eagles, Buffalos, Philharmonics — so you can buy and sell any quantity with zero IRS reporting requirements triggered at any step.

3

PLAN YOUR EXIT NOW

Metals prices can move fast — sometimes dramatically. If you need to space out sales to stay under reporting thresholds, you could miss the best selling window entirely. Choosing non-reportable coins gives you the freedom to sell everything at once, exactly when you want to.
